

NEA
EXFRUT
S.A.
FRESH FRUIT EXPORT

History

Nea Exfrut S.A. was founded in 1956 by Christos Sextos with main activity of packing and exporting grapes and cherries to the German market.

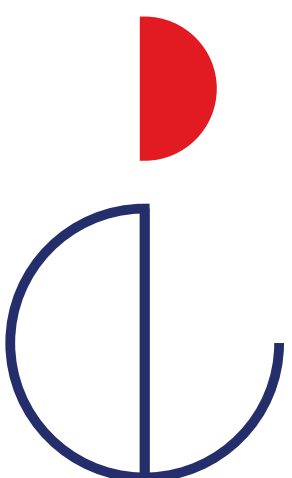

1991 marks the year of transitioning to the second generation of Nea Exfrut S.A.

Dimitrios and Georgios, sons of Christos Sextos, took the lead in the company and expanded it by investing in new buildings, modern machinery and introducing new products.

Consequently, Nea Exfrut S.A. continues its operation as a third-generation family company guided by the same core values:

- Quality
- Flexibility
- Stability

These values have established Nea Exfrut S.A. as one of the strongest companies in the fruit and vegetables sector in Greece.

Facilities

The company operates in two packing houses with state-of-the-art facilities and machinery for fresh fruit packing. All the packing processes take place in air-conditioned areas. The total cold storage capacity ranges from 8.000 to 10.000 tones.

- **Nea Exfrut S.A. “Skydra” – 16.000 m² plot**

- o 7.600 m² of packing house – cold storages – dry storage
- o 450 m² of head offices
- o 350 m² staff facilities

- **Nea Exfrut S.A. “Rizo” – 90.000 m² plot**

- o 10.200 m² of packing house – cold storages
- o 3.500 m² of dry storage
- o 200 m² of head offices
- o 400 m² of staff facilities
- o 300 m² of staff facilities and offices
- o 3 hectares of experimental apricots farm
- o 1,5 hectares of experimental cherries farm

Timetable

Nea Exfrut S.A. applies an effective rotation of seasonal fruits with respect to the unique weather attributes of Greece, achieving top quality production throughout the year.

Fruit Origin

Nea Exfrut S.A. collaborates with farms all over mainland Greece. The main priority is to always harvest the highest quality fruits with the strictest growing practices.

Export Destinations

Exporting activities spread to the most competitive and demanding supermarkets and retailers of Europe.

Quality Assurance

The philosophy of Nea Exfrut S.A. is:

- Continuous improvement of the quality aspects of its products
- Environmentally friendly production
- Supply of fully certified products
- Standardization and flexibility

65 years of experience in the fruit sector, along with permanent well-trained personnel, offers the capability to constantly supply high quality products to its customers.

All of Nea Exfrut S.A. products are being produced based on the principles of Integrated Crop Management and carry a **GLOBALG.A.P.** certification.

In addition, **TESCO Nurture** add-on is being implemented.

Quality control and traceability procedures are applied in every step of production, from farm to customers.

Concerning the secondary handling of products, both packing houses implement the strict food safety and quality standards:

- BRC Global Standard for Food Safety (BRCGS), formerly known as British Retail Consortium (BRC)
- International Food Standards (IFS)
- The company, being sensitive to social and labour issues, implements:
 - GLOBALG.A.P. Risk Assessment on Social Practice (GRASP) both in its packing houses and farms
 - SMETA 2-Pillar of Labour Standards and Health & Safety

Food Safety

The Global Partnership for Safe and Sustainable Agriculture

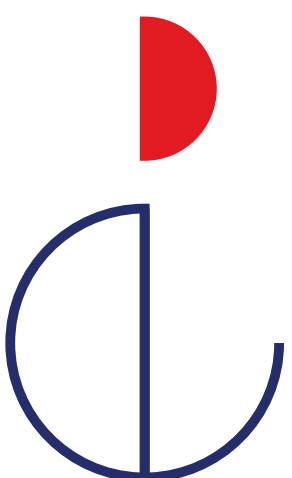

Sustainability

Being sensitive about our planet, Nea Exfrut S.A. is constantly trying to reduce the environmental impact of its production. This is being achieved by continues research on ways to reduce its carbon footprint.

The most recent achievements include:

- The installation of 800 KWp solar panels in buildings' roofs
 - o 2.000 tons of CO2 reduction in 18 months
 - o Future installation of additional 800 KWp
- Using less plastic in packages
 - o Change to paper solutions
 - o Use of recyclable plastic
 - o Swift to reusable boxes
- Setting GHG reduction targets based on Science Based Targets initiative (SBTi)
- Future implementation of ISO14064 - International Standard for GHG Emissions
